THE ANYTIME, ANYWHERE MIGRAINE MEDICINE™

As of 12/23

**MOST HAVE
FAST
MIGRAINE
PAIN RELIEF
WITHIN 2 HOURS**

In clinical studies, 60% of people had migraine pain relief within 2 hours.

What is UBRELVY[®] (ubrogepant)?

UBRELVY is a prescription medicine used for the acute treatment of migraine attacks with or without aura in adults. UBRELVY is not used to prevent migraine headaches.

IMPORTANT SAFETY INFORMATION

Do not take UBRELVY if you are taking medicines known as strong CYP3A4 inhibitors, such as ketoconazole, clarithromycin, or itraconazole, or if you are allergic to UBRELVY or any of its ingredients.

Please see additional Important Safety Information throughout. Please see accompanying Consumer Brief Summary or visit https://www.rxabbvie.com/pdf/ubrelvy_pi.pdf for full Prescribing Information.

ARE YOU FINDING THE MIGRAINE RELIEF YOU NEED WITHOUT THE TRADEOFFS YOU DON'T?

When migraine strikes, do you ask yourself if the trade-offs of treating are worth it?

Do you think maybe you'll just push through the pain?

Do you wait to see if it's a bad migraine before you take something?

Do you ever hesitate to take your migraine medication?

**UBRELVY CAN BE ANOTHER
OPTION TO TREAT YOUR
MIGRAINE ATTACKS.**

**TALK TO YOUR DOCTOR ABOUT
YOUR MIGRAINE TO SEE
IF UBRELVY IS RIGHT FOR YOU.**

IMPORTANT SAFETY INFORMATION (CONT.)

Before taking UBRELVY, tell your healthcare provider about all your medical conditions, including if you:

- Have high blood pressure
- Have circulation problems in your fingers and toes
- Have liver problems
- Have kidney problems
- Are pregnant or plan to become pregnant
- Are breastfeeding or plan to breastfeed

Please see additional Important Safety Information throughout. Please see accompanying Consumer Brief Summary or visit https://www.rxabbvie.com/pdf/ubrelvy_pi.pdf for full Prescribing Information.

Rx Only

UBRELVY[®]
(ubrogepant) tablets

100 mg

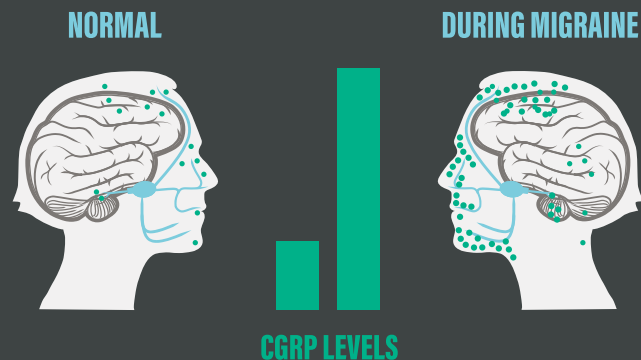

1 tablet

In clinical studies, 60% of people had migraine pain relief within 2 hours.

UBRELVY WORKS DIFFERENTLY

UBRELVY is an oral non-narcotic pill and is the first in a different class of medication for the acute treatment of migraine.

Unlike older migraine medicines, UBRELVY is the first migraine pill of its kind designed to directly block the receptor for the calcitonin gene-related peptide (CGRP) protein believed to play a major role in migraine attacks by causing pain and inflammation.

IMPORTANT SAFETY INFORMATION (CONT.)

Tell your healthcare provider about all the medicines you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements. Your healthcare provider can tell you if it is safe to take UBRELVY with other medicines.

UBRELVY may cause serious side effects, including:

- **Allergic reactions:** Most reactions happened within hours after taking UBRELVY and were not serious. Some reactions may occur days after taking UBRELVY. Call your healthcare provider or get emergency help right away if you have swelling of the face, mouth, tongue, or throat or trouble breathing.

UBRELVY BLOCKING CGRP DURING A MIGRAINE ATTACK

UBRELVY is a CGRP receptor antagonist, which means it is **designed to block these proteins** from attaching to your sensory nerve endings.

IMPORTANT SAFETY INFORMATION (CONT.)

- **High blood pressure:** New or worsening of high blood pressure can happen. Contact your healthcare provider if you have an increase in blood pressure.
- **Raynaud's phenomenon:** A type of circulation problem can worsen or happen. Raynaud's phenomenon can lead to your fingers or toes feeling numb, cool, or painful, or changing color from pale, to blue, to red. Contact your healthcare provider if these symptoms occur.

Please see additional Important Safety Information throughout. Please see accompanying Consumer Brief Summary or visit https://www.rxabbvie.com/pdf/ubrelvy_pi.pdf for full Prescribing Information.

EARLY SIGNS

People who took UBRELVY at the early signs of a migraine attack stopped intense head pain before it started.

UBRELVY treats migraine attacks in adults and is not for migraine prevention. In pivotal clinical studies, some people had pain freedom within 2 hours. In another study with people who could reliably predict a headache 1-6 hours before it began, 46% avoided moderate to severe head pain for 24 hours when taking UBRELVY 100 mg (vs 29% on placebo). Not everyone had pre-headache symptoms; some studied couldn't accurately predict their headaches. The most common side effects were nausea, dizziness, and tiredness.

ASK YOUR DOCTOR ABOUT TREATING MIGRAINE AT EARLY SIGNS WITH UBRELVY

With UBRELVY 100 mg, people were able to avoid migraine pain when taken during early symptoms of a migraine attack. Being able to identify early signs, and taking UBRELVY during those early signs, can help you avoid head pain. Treating early in the attack isn't for everyone, and some can't accurately predict their headache. Talk to your doctor before changing how you treat migraine attacks.

EARLY SIGNS OF A MIGRAINE ATTACK COULD MEAN HEAD PAIN IS NEXT.

The way you experience migraine attacks may be different than others, but attacks generally have 4 stages.

PEOPLE WHO TOOK UBRELVY EARLY WERE

2X

**MORE LIKELY TO AVOID
INTENSE HEAD PAIN
THROUGH 24 HOURS**

1 PRODROME/PRE-HEADACHE

- Neck pain or stiffness
- Light sensitivity
- Tiredness/sleepiness/fatigue
- Sensitivity to sound
- Dizziness/lightheadedness/vertigo/imbalance

2 AURA

- Visual disturbances
- Temporary loss of sight
- Numbness and tingling

3 HEAD PAIN

- Head pain
- Light and sound sensitivity
- Nausea and vomiting

4 POSTDROME

- Drained
- Confused
- Washed out

Note: Not everyone has these signs, and they can differ from person to person.

IMPORTANT SAFETY INFORMATION (CONT.)

The most common side effects of UBRELVY are nausea (4%) and sleepiness (3%). These are not all of the possible side effects of UBRELVY.
